

## Flexibility on your own terms: Egholm launches new rental solution

With a new rental solution for machines and single attachments, Egholm provides cutting-edge utility machines for a monthly fee thus relieving you of long-term investments and maintenance costs.

When you need a specific or seasonal job done without restricting your liquidity, Egholm Rental is a cost-effective alternative to buying a professional utility machine for your sweeping, ground care or winter tasks. In these cases, machine rental is not only the most economical and flexible solution but also the more transparent and calculable choice.

“There are no surprises - with Egholm Rental, you know exactly what to pay each month making the planning much easier,” says Norbert Birkendorf, Group Rental Manager at Egholm.

### The choice is yours

With Egholm’s team of specialists by your side, you can choose between all Egholm utility machines: Park Ranger 2150, City Ranger 2260 and City Ranger 3070 which are among the leading machines on the European market. These can all be combined with numerous tailor-made attachments and the rental time frame is completely up to you. “You can choose a short-term rental for seasonal peak or a major event. A seasonal rental for a period up to 7 months which is a great way to increase your capacity during winter or summer. Or a long-term contract covering any period of your choosing,” says Norbert Birkendorf.

### Insourcing gets the job done

Instead of relying on external partners for certain needs within the field of urban cleaning, Egholm Rental also enables you to let your own staff perform the tasks which is often the cheaper and faster way to solve the job at hand. Furthermore, a Quick-shift system increases the efficiency as the change of attachments can be done in just a few minutes with no tools needed.
